COMPUTER SCIENCE AND ENGINEERING
INFOMEISTER

PROJECT TITLE

- **Problem Statement :**
- **Team Name :**
- **Team Members Name :**
- **Domain Name :**

OBJECTIVES

- Explain the main goals of the project and what it aims to achieve.
- Identify the intended users of the project.

PROPOSED SOLUTION

- Describe the proposed solution.
- Explain how it addresses the identified problem.

INFO
institute of engineering

TRISQUADATHON 2.0

TECHNICAL APPROACH

- Technologies to be used (e.g. programming languages, frameworks, hardware) Methodology

SYSTEM ARCHITECTURE

- Show the main components of the system and how they work together.
- Explain how data moves from input to processing and final output.

FEASIBILITY AND VIABILITY

- Analysis of the feasibility of the idea Potential challenges and risks Strategies for overcoming these challenges

IMPACT AND BENEFITS

- Explain how the project helps users and solves real-world problems.
- Describe its practical, social, and economic benefits.

SREEN SHOTS OF DASHBOARD

- Screenshots showcasing the developed application's user interface and key features.-
- Visual demonstration of the system's functionality, workflow, and output.

CONCLUSION

- Summarize the project and how it addresses the identified problem.
- Highlight its main benefits and expected outcomes.

FUTURE SCOPE

- Explain the features that can be added in future versions.
- Describe how the project can be improved and used on a larger scale.

REFERENCES

- List the research papers, websites, documentation, and other sources used.
- Provide source details that support the project development and technical approach.
